

A new look for the NCC 2022 Public Comment Draft

As part of the ABCB's commitment to delivering a National Construction Code (NCC) that is user-friendly and modern, we've made some changes to the NCC 2022 Public Comment Draft (PCD) process, to improve your experience commenting on the code's draft content.

Round 1
All NCC content except energy efficiency and condensation

Due to the significant volume of proposed changes in NCC 2022, comment will be sought via 2 separate consultation processes to reduce the burden on stakeholders. The first round of consultation opens on **Monday 10 May**, seeking comment on all NCC content except energy efficiency and condensation.

Round 2
Proposed content relating to energy efficiency and condensation

Proposed content relating to energy efficiency and condensation will then open for comment on **Monday 19 July**.

New code structure & format
Access supporting resources abcb.gov.au/ncc-useability

Within the PCD, you will notice the code's new structure and format. You can read about these changes and access a range of supporting resources at abcb.gov.au/ncc-useability.

The PCD Process has moved online to the **ABCB's Consultation Hub**

The way you provide your comments will also be different this time around. We've moved the PCD process online to the ABCB's Consultation Hub, for a streamlined and more user-friendly experience consultation.abcb.gov.au.
